

Coulter Blades Reference Information

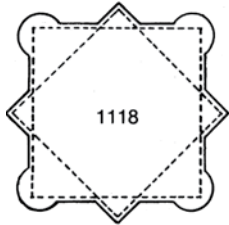

Bolt / Hole Pattern Reference Information.

COULTERS AVAILABLE IN:

	AC Center Hole: 1-13/16" Bolt Circle: 3-1/4" Bolt Holes: 6-13/32"	Fits Allis Chalmers - Duetz Allis.	Fluted, and wavee.
	CA Center Hole: 2-1/4" Bolt Circle: 3-1/2" Bolt Holes: 6-13/32"	Fits older Case plows. (Before Case-IH).	Fluted only.
	FD-6 Center Hole: 2-13/16" Bolt Circle: 4-1/8" Bolt Holes: 6-3/8"	Fits older Ford plows with 6 bolt pattern.	Fluted only.
	IH 31/32" X Center Hole: 1-11/32" Bolt Circle: 3-1/4" Bolt Holes: 6-11/32"	Fits International Harvester hubs with rectangular center hole, before Case-IH.	Fluted and wavee.
	IHN Center Hole: 1-1/2" Bolt Circle: 4-1/2" Bolt Holes: 4-17/32"	Fits Case-IH newer hubs.	Fluted only.
	JD Center Hole: 2" Bolt Circle: 3-1/2" Bolt Holes: 6-13/32"	Fits JD7000 series planters with OEM coulter units.	Fluted and wavee.
	JDM Center Hole: 2-1/8" Bolt Circle: 4-3/4" Bolt Holes: 5-33/64"	Fits JD7200 and newer planters, same pattern as JD metric plows.	Fluted and wavee.
	MF Center Hole: 3.172" Bolt Circle: 4-3/4" Bolt Holes: 4-15/32"	Fits Massey Ferguson plows.	Fluted only.
	MLWR or MWR Center Hole: 3-11/16" Bolt Circle: 5" Bolt Holes: 4-17/32"	Fits many different coulters including DMI, Melroe, Marliss, Noble, Sunflower, Blue Jet, Tye, and others.	Fluted, wavee, and plain edge.
	OL Center Hole: 4" Bolt Circle: 5-1/4" Bolt Holes: 4-17/32"	Fits many different coulters including Oliver, White, Yetter, Great Plains, Marliss, New Kinze, Krause, and others.	Fluted, plain edge dished coulter, and wavee.
	R Center Hole: 3-3/4" Bolt Circle: 5" Bolt Holes: 6-7/16"	Fits Rawson.	Fluted and wavee.

Bolt / Hole Pattern Reference Information.

Dual Hole Patterns

Order numbers ending in 1118 (coulters and disc blades) means that there are two hole patterns combined into one. By putting the blade on in one direction it fits the 1" square axle, the other way (1/8 of a turn) the blade fits 1 1/8" square axle.

Order numbers ending in 1814 (coulters and disc blades) means that there are two hole patterns combined into one. By putting the blade on in one direction it fits the 1 1/8" square axle, the other way (1/8 of a turn) the blade fits 1 1/4" square axle.

	DKDMW Center Hole: 2" Bolt Circle: 3-1/2" Bolt Holes: 6-13/32" 5-33/64"
--	--

this hole pattern is a combination of DW, KW, and DMW hole patterns to fit all John Deere planters after JD 7000 and fits the older Kinze 6 bolt.

	MLOL or YMR Center Hole: 4" Bolt Circle: 5" & 5-1/4" Bolt Holes: 8-17/32"
--	--

this is a combination hole pattern that will fit Yetter, Salford, Great Plains hole patterns and also DMI/Blue Jet hole patterns.

Coulter Blade Helpful Information:

FLUTED COULTER (also known as a ripple coulter)

Good penetration and cutting - moderate soil disturbance and tilling action- good for varying conditions. Used mostly on moldboard plows, tool bars, and fertilizer coulters.

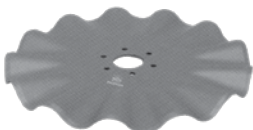

PLAIN COULTER

Good penetration and cutting - Virtually no soil disturbance. Used mainly on disc chisels, tool bars, stabilizer coulters, and seed disc openers.

NOTCHED COULTER

Good penetration and cutting in heavy residue - little to no soil disturbance.

WAVEE COULTER

Moderate penetration and cutting - high soil disturbance.

Vortex Coulter - New!!

You will find the new Vortex coulters only at CFC Distributors. The design of this blade is very similar to the Turbo[®] coulters manufactured by Osmundson Manufacturing and sold by Great Plains. The only difference is that the flutes coming out from the center have a slight arc or curvature to them as opposed to a straight line from the center.

"Turbo[®]" is a registered trademark owned by Osmundson Mfg. Co. and CFC Distributors Inc. has no relationship of any kind with Osmundson Mfg. Co. (Thankfully)

16" Diameter (4 mm thick)

Coulter Hub Repair Parts

W120 hub fits Yetter, Great Plains, Ausherman, Oliver, & WFE.

ORDER NO.	DESCRIPTION	STOCK	RETAIL
W120	Coulter hub unit.	65524	\$36.51
APYCAP	Dust cap only, fits W120 hub.	198	\$1.30
KW120	Bearings, seals, cup for Yetter hubs (W120) .	5497	\$13.50
GA5622	Bearing for Kinze No-till coulter built 1991-2001, 2 used per row. Replaces Kinze number GA5622.	7968	\$9.95
B5206KPP3	Double row bearing for Kinze 4 bolt no-till coulters built 2001 and later. 1 used per row. Replaces Kinze number GA8603.	7965	\$9.95

B5206KPP3

New Style Blade for Toolbars

25 wave coulter does a better job of protecting expensive fertilizer knives and giving more loose dirt for sealing purposes. 25 wave design also keeps the blade turning in loose soils to prevent trash build up.

ORDER NO.	DESCRIPTION	WT.	STOCK	RETAIL
M2520YMR	Blade to fit Yetter, GP, Ausherman, DMI, Blue Jet, Tye, Salford & others.		44527	\$36.34

New Innovations From CFC!

Vertical Tillage Blades

The benefits and rewards of the new “Vertical Tillage” tools are becoming more and more obvious as time goes on. However, the prices of some of these new machines are astronomical even with \$7.00 corn. For a fraction of the cost of one of these new machines, you can construct your own “Vertical Tillage” machine.

Using any of our wave edge coulters, remove the blades from your old disc, straighten the gangs, install the wave edge coulters in place of the old disc blades, and you have created your own “Vertical Tillage” tool. (You may need to add weight to the disc in certain heavier soil conditions.)

This machine can be utilized two season per year. In the spring, when the ground is still slightly wetter than it should be for planting, you can run this machine over the seedbed about 6 to 8 miles per hour, 2” to 2-1/2” deep and create a perfect seedbed for planting. The soil dries quicker and allows you to get on the field and plant sooner than expected. In the fall of the year, use it to chop corn stalks into small segments that will get worked into the ground with the tillage action of the blades for quicker decomposition over the winter.

Available Blades for Disc Conversions:

- 20” x .177 (7Ga) thick, 13 wave: 1.25” wave
- 22” X .236 (1/4”) thick, 13 wave: 1.25” wave
- 20” x .177 (7 Ga) thick, 25 wave: 3/4” wave

- * Breakdown Residue.
- * Level Soil.
- * Incorporate Fertilizer.

- * Warm the Soil.
- * Reuse Bearings and spacers.

20” & 22” Diameter

ORDER NO.	CUT	DESCRIPTION	WT.	STOCK	RETAIL
K18071814	1.22”	18” diameter, 13 wave, fits 1-1/8” square or 1-1/4” square.	15	58421	\$35.50
K2007	1.25”	20” diameter, 13 wave, pilot coulters - cut to anysize hole.	16	55521	\$36.50
K20071814	1.25”	20” diameter, 13 wave, fits 1-1/8” square or 1-1/4” square.	16	55525	\$36.50
K2214	1.25”	22” diameter, 13 wave, pilot coulters - cut to anysize hole.	26	38231	\$46.90
K22141814	1.25”	22” diameter, 13 wave, fits 1-1/8” square or 1-1/4” square.	26	38235	\$46.90
M2520P	3/4	20” diameter, 25 wave to fit disc arbors, specify hole size.		55525	\$36.50

We can cut the center hole to fit most axle sizes. Please measure the disc arbor before ordering to insure correct hole size in the blades.
